To: Interested parties

Subject: COVID19 Impact Statement

The COVID-19 virus' impact on the supply and processing of products and materials is a subject our customers, organization and other interested parties have concerns and questions about. As an OEM, Davis Aircraft Product Co; Inc.'s (DAP) ability to work from home is severely limited. DAP has adapted changes to abide by state and federal guidelines and has taken actions internally to optimize safe social distance where possible and a heightened attention to cleaning and disinfecting. DAP has a cross-trained team to address anticipated absence in the workplace and is working to minimize performance impact. In addition, we recommend to our customers and staff to limit visits to only essential matters.

The current situation has not discernably affected the processing and release of product to our customers, nor the supply of materials purchased, and special processes subcontracted. At present we do not have any suppliers with shelter-in-place restrictions that would impact processing. This is a matter we will continue to monitor. As needed DAP will adjust and transfer material sourcing and outside processes to those who are less affected.

To ensure continuing awareness we ask that our customers and suppliers continue to keep DAP informed of significant changes in planning, scheduling and/or support capability. As the COVID-19 situation and extent evolves Davis Aircraft will update its policy that is made available at [www.davisaircraft.com](http://www.davisaircraft.com).

Thank you for your understanding and support during this unprecedented time.

Doug Davis
